

Aircraft Seat Solutions

At Airworthy Aerospace, we understand your critical need to fill your airline's seats – and your critical need to ensure those seats are attractive, comfortable and fully operational for your passengers, crew and cabin attendants. Our impeccable refurbishment, repair, overhaul, modification and zero-time services – available for nearly all airline seats – helps you accomplish these goals.

By utilizing state-of-the-art technology, including our advanced Air Solutions software and ERP system, we ensure precise and timely airline seat repairs. Or, if you prefer, we can work with your engineering department to quickly create OOP parts. The result is a supremely comfortable, like-new aircraft seat that provides your passengers with a positive experience – and a lasting impression.

Our Airline Seat Solutions include:

- Thorough cleaning and sanitizing
- Detailed tear down
- Replacement of damaged and broken parts
- OEM, PMA or Owner/Operated Produced Parts (OOPP)
- Food tray table repair (all types)
- Arm cap repair and recovering (leather, urethane or molded)
- In-seat power system integration
- IFE installation and repair
- LOPA development
- FAR Part 25 flammability and toxicity testing
- FAA 8130 Airworthiness approval tag
- FAA DER and DAR support services
- Certification and modification services

Let us show you how we are raising the bar on quality airline seat solutions – and how we can provide the best solution for you.
