

Airline Carpet Solutions

We are proud to be recognized as the **aircraft carpet solutions leader** and the largest and most technologically advanced aircraft carpet and non-textile flooring fabricator in North America. Cutting-edge innovation, meticulous attention to detail and precision, and complete access and reliability are just a few of the reasons why.

Airworthy Aerospace is the only carpet fabricator with two state-of-the-art, 12 foot continuous feed cutters, located in our two full-service manufacturing facilities in Hudson, WI and in Deerfield Beach, FL. We can overlap carpet production between both locations to ensure continuous production and delivery despite any conditions – and that means peace of mind for you. As our industry's technology pioneer, Airworthy was the first to use **Laser inspection devices** to elevate and ensure our high quality standards. Our onsite engineers use technology to ensure dimensional precision to less than 1/16 of an inch.

Our industry-leading carpet fabrication solutions include:

- Two state-of-the-art 12' wide carpet cutters
- Digital cutters with continuous feeders for unlimited carpet segment lengths, as well as the capability to part-mark each segment with complete manufacturing and customer information to ensure accuracy
- Experienced onsite engineers
- Laser inspection technology
- Relationships with all major aircraft carpet manufacturers, including Anker, Botany, Lantal, Manx, Mohawk, Neotex, and many more

Let us show you how our customized aircraft flooring programs can reduce your airline's total cost of ownership – and provide you with quality, value and peace of mind.
