

# Galley Cart Services

Airworthy Aerospace offers a full line of state-of-the-art airline galley cart services designed to ensure your equipment's complete functionality and aesthetic appeal. Our team is experienced in servicing equipment produced by Zodiac, Sell & Driessen, B/E Aerospace, Heath Tecna, Composites Unlimited, AIM Aerospace, DASELL, Diethelm Keller, Bucher, Britax and other top manufacturers – your assurance that it will be completed quickly, efficiently and cost-effectively.

As your partner, we also work closely with you to establish a preventative maintenance program for your carts, coffee makers, ovens and controllers – that extends your equipment's longevity and saves you significant time and money. Additionally, we can utilize less expensive PMAs and OOPPs, resulting in lower costs and labor rates, and 3-5 day turnarounds.

As a technology innovator, Airworthy recently introduced the use of Radio Frequency Identification (RFID) tags to automate our galley cart repair system. RFID tags electronically store information, including the frequency and cause of parts breakage, which significantly improves reliability and reduces your costs.

## Our comprehensive Galley Insert Services Include:

- Thorough deep cleaning and sanitizing services
- Detailed tear down
- Damaged or broken part replacement
- Certification and modification service
- LOPA designs and layouts
- On-site installation and support services
- Local repair and supply chain services
- FAR Part 25 flammability and toxicity testing
- FAA DER and DAR support services
- Full testing and return to service capability
- RFID tagging and tracking
